Portfolio: debasmit-sahoo.vercel.app

Education

Regional College Of Management

Bachelor of Computer Applications

Oct 2022 – May 2025

Bhubaneswar, Odisha

Technical Skills

Programming Languages: Javascript, Python

Web Development: React, Tailwind CSS

Other Skills: Git, Github, Data Structure and Algorithm

Projects

Admino

A React Admin Dashboard

Tech Stack: React, Material UI

GitHub Repository: github.com/debasmitsahoo/admino

- Real-time monitoring of critical metrics like **email sets**, **sales performance**, and **revenue trends**.
- Efficient tools for managing **team roles**, **contact details**, and **invoice tracking**.
- Displays data with visually appealing **bar**, **pie**, and **line charts** using libraries like **Nivo Charts**.
- Built with **modular components**, ensuring reusability and scalability for diverse applications.
- Designed with **CSS frameworks** like Tailwind CSS for a seamless user experience across devices.
- Implements efficient **state management** using **React hooks** and supports smooth rendering of large datasets.

CareSphere

A Patient Management System

Tech Stack: Python, Pandas

GitHub Repository: github.com/debasmitsahoo/Patient-Management-System

- Developed a **robust, scalable system** using **Python** and the **Pandas** library to manage and analyze patient data efficiently.
- Automated the generation of patient prescriptions and maintained records in Excel files, ensuring **data integrity** and **ease of access**.
- Created an intuitive **CLI-based user interface** for ease of use, featuring functionalities such as listing all records, generating reports, and printing prescriptions.
- Ensured secure and structured data storage in Excel files, leveraging Python for efficient **file handling** and **data organization**.

Certifications

Python

August 2023

Guvi Geek Networks, IITM Research Park

AI For India

August 2023

Skill India Digital Hub

AI/ML for geodata analysis

September 2024

Indian Institute Of Remote Sensing
